T nde

Robert B. Browne, DEAN OF EXTENSION
AND DIRECTOR OF THE SUMMER SESSION

The Audio-Visual Aids Service was established in 1932, as a means of furthering the use of such aids in reinforcing the instructional programs of the schools of Illinois. This was at a time when the movement for using such aids was in its infancy. It resulted from requests by the school people themselves, who asked the University to create a lending library of educational films, slides, and recordings. The University entered upon this program with no intention of making a profit, but of using any receipts above operation costs for the enlargement of the collection and the strengthening of the Service; this we have done and will continue to do. The response, through the years, on the part of the school people has resulted in the first of such libraries in Illinois being the largest, and, I believe, the one of greatest usefulness.

Modern education is not limited to the schools alone, and the public libraries have become great borrowers of the Service, through the cooperation of the Illinois State Library. So, too, have adult education groups.

Mr. Smith and the members of the staff of the Service work very hard, indeed, to meet all the calls promptly and efficiently; and we are pleased by the ready willingness of most everyone to understand why booking requests cannot always be filled just as requested. The per cent of requests that are filled is very high.

I want to thank the many users of the Service who, unsolicited, have written me of their satisfaction with the Service.

All of us in the business of education must remain alert to discover the ways of using new tools in teaching and learning, so as to put them to their greatest usefulness. All of us have much yet to learn, but the motion picture, the recording, and other modern aids have demonstrated their values beyond dispute when properly used. Like the automobile, they are here to stay.

With the publication of our current Guide to Audio-Visual Aids, we are initiating the practice of printing the Classified Index of films as a separate volume. We believe that by following this practice, we can place titles and subject matter areas covered by our library into the hands of more individual teachers, at the same time keeping printing costs down to a reasonable figure.

If you are a classroom teacher, you may go to your Audio-Visual Director, Materials Coordinator, or School Administrator, who will have the Guide with alphabetically arranged descriptions of the titles you find in this Index. There you may consult the descriptions of titles which interest you, and order them through the central agency of the A-V director. If you are an Audio-Visual Director, Materials Coordinator, or School Administrator, place copies of this Index into the possession of as many individual teachers as possible. Additional copies may be secured by writing to the Audio-Visual Aids Service.

If you are a private individual, a teacher in a one or two teacher school, minister or other person who does not only the film selection, but the ordering, receiving and handling of films yourself, you will of course want both Guide and Index.

You may, if you are an Audio-Visual Director, want several copies of the Guide as well as the Index in the hands of individual teachers. You may do so by ordering additional Guides.

Special Information

SPECIAL PROGRAMS

The Audio-Visual Aids Service will assist anyone planning to use films or slides for a meeting. An experienced Special Programs Consultant will advise in choosing films, getting equipment, and preparing program notes.

SCHOOLS

We will help arrange special programs for assemblies, school club meetings, or a planned series of educational films.

COMMUNITY GROUPS

Program chairmen of service clubs will find the Program Consultant ready to assist them in plan-

ning either a single program or a series, based upon films, slides, or transcriptions.

ACCOUNTS

To facilitate ease in the handling of accounts, the Accounting Department has asked us to make the following request of our patrons: If you order films only occasionally, and the amount of the individual order is under five dollars, please submit the correct amount of service charges with the order. Please be sure to include postage and insurance charges in accordance with the rate schedule in the section on *General Instructions*.

Any out-of-state group may use the films *at the regular service charges*. Application should be made directly to Audio-Visual Aids Service, 203 Arcade Building, Champaign, Illinois.

SUGGESTIONS

The Audio-Visual Aids Service welcomes comments from the users of its service. Would you suggest:

1. New audio-visual materials which should be added to the loan collections?
2. Additional bibliographies which should be prepared?
3. Changes in the Index classifications?
4. Any other changes?

TIPS ON FILM CARE

The following tips on film care will help prolong the life of films and will make it possible to give better service to all patrons.

1. Clean projector film gate and all moving parts with which the film comes in contact before threading projector. Most film damage occurs because of scratching during projection.
2. Do not use sound films on a silent projector.
3. Turn some of the film through by hand (or with short starts) to check threading and to insure proper operation before running the film.
4. Let your fingers ride lightly on the film occasionally as it passes through the projector. If unusual noise or punctures in the film develop, stop projector immediately and rethread.
5. Stay by projector at all times when film is being projected.
6. If film breaks occur, return film with explanatory note which indicates section in which damage occurs. Under no circumstances should film be patched with pins, tape, or other materials.
7. Keep films away from excessive heat or moisture.
8. Do not splice films together to provide continuous shows. If this service is desired, make the request at the time film is booked.

General Information

DEVELOPMENT OF THE SERVICE

The Audio-Visual Aids Service began in 1932, as a depository for a few schools exchanging films cooperatively. The entire area occupied by the service was a cloak room in University High School. Within the next three years the Audio-Visual Aids Service had a rapid growth. As the cooperative arrangement and organization was suited to the use of only a few schools, it could not handle many additional patrons satisfactorily. Beginning in the fall of 1937 this cooperative feature was discontinued and film service was offered to schools on a rental plan which has proved more satisfactory to all concerned.

Since then, as a part of the Division of University Extension, and with the cooperation of hundreds of schools in Illinois and elsewhere, the Audio-Visual Aids Service has grown until it has become one of the largest Audio-Visual libraries in the United States.

In addition to being a depository of audio-visual materials, the Audio-Visual Aids Service is also a convenient source of information about the utiliza-

tion and acquisition of the newer teaching devices. Recently, the service inaugurated a library of tape recordings. A listing of the titles of master tapes available for reproduction is included in this Guide. When patrons wish to take advantage of this service, they send a blank tape to the Audio-Visual Aids Service, specifying which master tape they wish to have reproduced. The master tape is recorded on the blank and the tape returned to the patron. For further information see the *Tapes for Teaching* section of this Guide.

We look forward to a continuation of the many pleasant associations we have had with schools, with civic organizations, and with just people.

KIND AND SIZE OF FILMS DISTRIBUTED

All films are of the 16 mm dimension. Most film subjects are on 16 mm sound film.

All films loaned by the Audio-Visual Aids Service are on cellulose acetate base which means the films are non-inflammable. Both color films and black and white films may be had on loan. Sound films cannot be used on a silent projector.

HOW FILMS MAY BE ORDERED

Films may be ordered by mail, phone, telegraph or in person. Order blanks for convenience in ordering films have been prepared by the Service. The blanks may be had on request.

Here are some suggestions which, if observed, will enable the Audio-Visual Aids Service to handle your order expeditiously.

1. Order filmstrips, transcriptions, and tapes by the titles as they appear in our catalog. In the case of films indicate whether you want sound or silent, color or black and white films as sometimes the same title may be had in both versions.
2. If you have alternate dates on which you can use the film or films, be sure to indicate them.
3. Indicate clearly how long you want to use the film or films.
4. Order films under one name where possible. For example, several teachers in the same building or in several buildings of the same system might order all their films under the principal's or the superintendent's name or the name of the director of teaching materials.

In general, films should be ordered as far in advance of the precise date of use as is possible. However, since we have a number of copies of many subjects, short notice requests are acknowledged promptly if at all possible.

WHO MAY RECEIVE FILM SERVICE

Any school — public, private, or parochial — in the continental United States is eligible to receive films on loan from the University, as well as any organization, church, club, union, or business in the continental United States. Films deposited in the library by the Civil Aeronautics Administration (marked CAA in the descriptions) may be mailed outside the United States.

The films marked "TFC, Restricted to Classroom Use" are leased by the University and under the terms of the lease the films may be loaned only where they will be used as a part of regular instruction. The cuttings from film classics based on literary classics (David Copperfield, Huckleberry Finn, etc.) can be loaned only for classroom use.

USE OF PRODUCERS FILM GUIDES

Guides are shipped with films in some instances. The Audio-Visual Aids Service recommends that each school purchase the film guides wanted by the teachers direct from the film producer. The Audio-Visual Aids Service will gladly supply information to anyone as to availability of guides, names and addresses of producers and estimated costs of guides.

GENERAL REGULATIONS

1. Films and radio transcriptions are scheduled for one day's use only, unless a request is made for the use of the materials for a longer period of time. *Please note that materials may be ordered for one week without extra charge.* When permission is granted to hold films or radio transcriptions longer than one week, a fee for extra day's usage is charged in accordance with the extra day charge scale.

2. All materials should be returned immediately after scheduled showing. Materials kept longer than the allotted time cause the Service embarrassment and the next patron inconvenience. Films or radio transcriptions kept overtime are charged for at the regular single rental rates. Patrons are requested to give particular attention to the return of materials that may be in their possession on or immediately before holidays.

3. Patrons are urged to be considerate of cancellations. Anticipation of scheduled holidays and careful planning of classroom work will help us to avoid withdrawing films from circulation for showing dates which will not be utilized by the patron booking the film. Cancellation cannot be made after the shipment has left the Audio-Visual Aids Service. All films which are reserved and not called for on the date specified will be charged as usual unless prior arrangement is made for cancellation.

4. Return shipping labels are sent with all shipments. Patrons are required to use these labels in returning materials to the Audio-Visual Aids Service.

5. The patron is responsible for materials from the time such materials arrive until their return to the Audio-Visual Aids Service. The Service inspects all materials immediately after their re-

turn and maintains a record of the condition as received. Should any material be damaged when received by the patron, a report should be made immediately to the Audio-Visual Aids Service. Lost films will be charged to the patron at the rate of actual cost of replacement.

PRACTICE FILMS

Visual Aids will furnish practice films that you may retain in training operators. There will be a \$1.00 charge for a 200- to 400-foot roll of film mounted on a reel. This charge includes postage.

SERVICE CHARGES

All films have service charges varying from postage only to as much as \$20.00 in the case of several very expensive films. The service charge is given with each film description.

A postage and insurance charge of \$.15 per film will be added to all service charges (except in the case of films available for postage or handling charges only, or in occasional cases where the sponsor of a film bears postage expense). The term "insurance" refers primarily to insurance against loss in the mails. It is therefore unnecessary to insure return shipments, unless you so desire.

For those films in our catalog which are listed for postage only, a minimum charge of \$.50 will be made for each film. We are unable to keep postage accounts because of the costs involved. We shall be glad to ship those films without any additional charge via express collect. Unless specified, such films will be sent parcel post and the minimum charge will apply.

The service charge rates listed with the descriptions are for one to five day's use; or one school week. Saturdays, Sundays and holidays are not included. *All films are scheduled for one day unless specifically requested for longer periods.*

For film use beyond the basic one- to five-day period, the following schedule of rates applies: If films are requested on a daily basis (i.e., one, two, or three days beyond the basic rental period) these charges are also the overtime charges that will be assessed for each day that films are held beyond scheduled use periods. Shipping time is not included.

<i>Service Charge Rates</i>	<i>Extra Day Charges</i>
to \$1.50	\$.35
\$1.51-\$3.00	.60
\$3.01-\$4.50	.80
\$4.51 up	1.00

If films are requested on a weekly basis (i.e., one or two weeks beyond the basic rental period).

One week beyond basic period	1.5 times the
(Two total weeks' use)	catalog rate
Each additional week	.5 times basic catalog rate

For example, if a film is listed in the catalog as \$1.50 for one to five days' use, the charge for seven school days would be \$2.00 — \$1.50 plus \$.35 for each of two additional days. The film might, however, be rented for two full weeks for \$2.25; the basic rate of \$1.50 times 1.5.

Service charges are subject to change. We will make every effort to see that patrons are notified of changes, but cannot guarantee that such notification will reach all patrons before the changes become effective.

In the event of postal rate increases, the postage and insurance charge will be raised to \$.25.

When requested, films will be spliced together on one reel for programs. Charges for this service is \$.25 per film.

CLUB PLANS

Whatever your needs, you can now pay a flat rate for your entire film program and receive the same prompt, efficient service on all films.

Following are our Club Plan rates. *These Club rates are flat rates. There are no additional postage, insurance or handling charges.*

<i>No. of reels</i>	<i>Club rates</i>
50 reels	\$ 70
100 "	135
200 "	275
300 "	410
400 "	550
500 "	675
600 "	825
700 "	900
800 "	1,000
900 "	1,125
1,000 "	1,250

We will continue to use the regular producer's procedure of considering each 400 feet, or approximately 11 minutes, of film as one reel. Fractions of reels will count as full reels; for example, both a 15 minute film and a 22 minute film will be considered as two reels. Color will count double. If you wish to borrow deposited films which regularly have \$1.00 handling charges, each will be classed as one reel, no matter what their length, or whether they are black and white or color.

Compute the number of reels you will use, using our film guide or the H. W. Wilson Co. guide to determine running times and reel count. Then use the accompanying table to determine your *full film cost for the year*.

If your needs fall between the figures listed in the table; for example, 52, 105, or 207 reels, the additional films will be prorated on a single reel basis. For example 100 reels are \$135.00. This is \$1.35 per reel. If your request totals 110 reels, the additional ten would be $10 \times \$1.35$, or \$13.50.

You must subscribe in advance to this Club Plan. Payment, however, may be made when most convenient within the fiscal year.

Also, if you wish to borrow a film which is 3 reels color, and has a regular service charge of \$5.20, it will be counted as 5 reels, not 6. This will prevent Club Plan patrons from losing on longer color films. The Club Plan cannot be used on tape recordings, filmstrips, or on the several Disney films ("Seal Island," etc. . . .) in the library.

CARTOONS

You will find various cartoons listed throughout this catalog. New cartoons are constantly being added to the service. We can provide a program of cartoons to fit your requirements.

NOON-HOUR MOVIES

We can provide noon-hour movies of cartoons and shorts to fit your requirements.

20 minute reel	\$2.35
30 minute reel	3.35
40 minute reel	4.35
One hour (2 1200-ft. reels)	5.35

CHRISTMAS FILMS

You will find films for Christmas programs located throughout this catalog. The Visual Aids Service is constantly adding additional copies of existing Christmas films and also new releases. However, you are urged to order such films early. All Christmas films have a basic rental period of one day. The weekly rate is double the one-day rate.

All Christmas films will be sent special delivery and you are requested to return them special delivery. Delay may disappoint others.

PARCEL POST RATES

Educational motion pictures may now be mailed at the same rate as formerly applied to books.

If you are mailing films to the Visual Aids Service, or receiving films from the Service, the following rates apply:

1. Zones one, two, or three, or within the state in which mailed: 4 cents for the first pound, 1 cent for each additional pound or fraction thereof. Packages must be marked "Sec. 34.84(e) P.L.&R."
2. Anywhere in the United States, beyond the third zone, or beyond the state in which mailed: 8 cents for the first pound, 4 cents for each additional pound or fraction thereof. Packages must be marked "Sec. 34.84(h) P.L.&R."

TV USAGE

Most of the films in this Guide cannot be used for television purposes without the written permission of the copyright owners. There are a few exceptions to this rule. Write us for a special listing of our films which may be televised.

Our Confirmation form is shown on the next page. You receive one or more of these forms each time you borrow materials from our library. MATERIALS SHOULD NOT BE CONSIDERED BOOKED UNTIL CONFIRMATIONS ARE RECEIVED, AND ALL CONFIRMATIONS SHOULD BE CHECKED CAREFULLY AND SAVED at least until the shipment has arrived, preferably until you have been invoiced for the materials. If you do not receive Confirmations

VIA	CONFIRMATION ONLY	B 3017
		FROM: VISUAL AIDS SERVICE UNIVERSITY OF ILLINOIS CHAMPAIGN, ILLINOIS
SHIP	USE	
SAVE	YOUR CONFIRMATION OF FILMS SCHEDULED AT YOUR REQUEST RETURN FILMS IMMEDIATELY AFTER SCHEDULED USE	SAVE

within ten days of placing your requests, please notify us.

The purpose of most of the features of this Confirmation are obvious to the casual observer. In the upper hand portion, to the left and right of the vertical line, are typed the title or titles, and rack-file numbers of materials ordered. Below this are placed the ship and use dates, below these is the patron's address.

One or two features of the form are not as obvious. The blocked-out area to the right of the place where titles are typed is where our typists put the amount of the service charge for the material. This is blocked out because of the fact that figures typed here sometimes were confused by post-office employees with street numbers, C.O.D. charges, special handling charges, etc. If you wish the amount of each service charge on your Confirmations, we shall be happy to write these charges in. It has not been found to be necessary very frequently in the past as patrons always receive itemized statements of materials used and charges with invoices.

The red number in the upper right corner of the form is the order number. IF THIS NUMBER IS REFERRED TO IN TELEPHONE CALLS OR CORRESPONDENCE, IT WILL MEAN A TREMENDOUS SAVING OF TIME FOR OUR OFFICE STAFF. All shipping tickets, invoice tickets, and order labels are filed according to this number.

Attention to these facts will result in better service for you.

INDEX

The classified index of films is being published separately from this descriptive listing. The increased size of the Visual Aids library and high printing costs have made publication of the catalog quite expensive. The classified index by itself, however, can be printed fairly inexpensively. We can, therefore, furnish the index free of charge.

This plan, we believe, will make it possible to furnish school systems with one or two copies of descriptive listings, and larger numbers of indexes. It will in this way enable school systems to make information on available films readily accessible to all teachers, at the same time keep expenses to a reasonable figure.

Please contact us for the amount of additional indexes you need.

POLICY ON LATE RETURNS

Our shipping department has instructions to ship all materials at least one day ahead of scheduled shipping dates. In the event some materials are held overtime by previous users, we will not cancel the order completely but will send the materials late to the next patron. Use dates are to be changed on the order and *plenty of time is to be allowed the next patron to make adequate use of the material.*

In this way, we hope to better serve our patrons. If complete cancellations are made, patrons are disappointed when it is then found that subjects are not available when reordered.

If the materials sent to you are too late to be of use, please *return them with a letter explaining* that they could not be used. Charges will then be cancelled. We will of course not send materials late when they are for specific program dates.

SHOULD FILMS BE RETURNED BY PARCEL POST OR EXPRESS?

Parcel post charges for transporting films are much less than express charges. However, there is often some local reason which leads a patron to request that all shipments to and from the patron be made by express. All transportation charges are at the expense of the borrower.

INDEX TO ABBREVIATIONS

Film descriptions employ standard abbreviations as follows:

general — Suitable for general audience use

p — Suitable for primary grades

i — Suitable for elementary school use

j — Suitable for junior high school use

h — Suitable for senior high school use

c — Suitable for college or university use

a — Suitable for use with adults

\$0.00 — Indicates the service fee for use of the film. See section dealing with terms of use and fees for further information.

HOW TO READ FILM DESCRIPTIONS

The film descriptions beginning on page 17 of the "Guide" take the following form:

GOOD SAMARITAN (RFA)

The parable of Jesus, enacted by puppets, and adapted for children.

p-i-j 14 minutes \$5.00

The abbreviation following the title of the film refers to the producer. A listing giving the full names of the producers is found on pages 559-569. If the film is in color or restricted to classroom use, it is so noted immediately after the abbreviation for the producer.

The index to abbreviations listed in the preceding section refers to the audience of a particular film. These abbreviations are found in the bold line at the end of the listing, preceding the length of the film. In choosing a film, these audience abbreviations should be closely checked to be sure that the film will appeal to the correct audience level.

DESCRIPTIONS OF FILMS RECEIVED TOO LATE TO INCLUDE IN GUIDE

COFFIN ON WHEELS

(TFC, Restricted to Classroom Use)

An exposé of the unethical dealers in the used car business.

j-h 20 minutes \$1.85

FROM SILK WORM TO PARACHUTES (IIS)

Shows the silk industry of Kashmir, and traces the manufacture of silk from the time the silk worm leaves the cocoon until the parachutes are ready for use. Shots of shawls, silk products and embroidery are included.

h-c-a 10 minutes \$1.85

FRUSTRATION PLAY TECHNIQUES (NYU)

Study of normal personality development in young children, and a demonstration of special techniques (intrusions, blocking and hostility games) in the diagnosis of normal personality.

c-a 35 minutes \$4.35

FUNDAMENTALS OF MASSAGING (UW)

Shows proper position of patient for massage; how to perform superficial and deep stroking and the importance of rhythm in stroking; how to knead; how to perform friction and the value of each type of massage motion.

a 12 minutes \$1.85

FLORIDA KEYS (FON)

Explains the origin of the keys from the mangrove seed embedded under water to the full development of one of the Florida Keys. Depicts the interrelationship of plant and animal life.

i-j-h-c-a 14 minutes \$2.70

FLY ABOUT THE HOUSE (CU, Color)

An animated film which shows the danger of food contamination by flies in the house.

h-c-a 10 minutes \$3.35

FORWARD A CENTURY (BIS)

Contrasts social and industrial life in Great Britain with respect to the exhibitions of 1851 and 1951. Contemporary prints and exhibits showing Britain in the second half of the nineteenth century comprise the first part. The second part emphasizes the changes that have taken place in communications, oil, electricity and medicine. Also surveys British science and industry of today.

h-c-a 30 minutes \$3.85

FRA ANGELICO AT SAN MARCO (AFF)

Shows the frescoes painted by Fra Angelico in the convent of San Marco between 1436 and 1446. Includes the "Annunciation" and the "Crucifixion."

h-c-a 11 minutes \$1.85

GOLD RUSH BOY (CW)

A day in the life of a young boy as it might have been in the days of the "Gold Rush," filmed principally on location in the "mother lode" country.

i-j 16 minutes \$3.00

HEREDITY AND FAMILY ENVIRONMENT (McGH)

Demonstrates the joint roles of heredity and environment in shaping the personality of the individual and their interrelationship in everyday living.

h-c-a 9 minutes \$3.00

MARVELS IN MINIATURE (ANIB, Color)

Shows underwater life of the Barrier Reef under the magnifying glass, depicting the thousands of small particles that make up the plankton upon which the smallest of fish feed. Marine life from the smallest diatoms and eggs of tiny sea creatures to the ghost shrimp and the sea worm are seen.

j-h-c-a 15 minutes \$3.25

MARY VISITS POLAND (McGH)

Mary, an elementary school girl, describes to her class her experiences in visiting her grandparents in Poland. She takes her class into a Polish school, into the Polish homes and into the fields where the agricultural activities are seen. She also shows the class the beautiful costumes and colorful dances of the Polish people.

i-j-h-c-a 10 minutes \$3.00

MEASURING SIMPLE AREAS (KB)

Demonstrates how to compute the areas of simple parallelograms, rectangles and triangles.

i 10 minutes \$3.00

POSTNATAL CARE (MF)

Shows the mother in her hospital room doing exercises, caring for her baby, nursing, etc. It discusses the father's relation to the new situation and portrays some of the joy to be found in parenthood. Diagrams illustrate how the mother's body returns to normal.

c-a 12 minutes \$3.00

POSTURE AND PERSONALITY (AUF, Color)

Emphasizes the correlation between posture and personality by showing the influence of posture upon appearance and the efficiency in sports, games, making friends and getting a job.

j-h 12 minutes \$3.00

POSTURE PALS (AUF, Color)

Four elementary school children learn to help each other and enlist the help of their parents in a posture improvement league.

p-i 10 minutes \$3.00

POTTERY WORKERS OF OAXACA (AD, Color)

Depicts the Zapotec Indians who live in Oaxaca. Shows how they make pottery with the potter's wheel (which was introduced in Mexico by the Spanish) and also by a much more ancient method of making turned ware.

i-j-h-c-a 14 minutes \$4.35

PRECISELY SO (GM)

Traces the development of modern standards of accuracy from ancient times. Illustrates scientific instruments that measure time to the thousandth of a second, weigh a pencil dot on a sheet of paper, and split a hair-breadth measurement into hundreds of parts.

h-c-a 20 minutes \$2.85

PSYCHIATRY IN ACTION (BIS)

A presentation of the results and treatment of war neuroses in British hospitals by professional workers in the fields of abnormal personality, medicine, nursing, neuropsychiatry, social work and occupational therapy.

j-h-c-a 62 minutes \$7.50

RENAISSANCE INTRIGUE

(TFC, Restricted to Classroom Use)

Excerpt from the feature film "Prince of Foxes" produced by 20th Century Fox.

The struggle between Cesare Borgia and the independent principality of Citta del Monte is portrayed in a fictional incident, using authentic costumes and settings of the Italian Renaissance.

j-h 20 minutes \$3.50

RHYTHM OF AFRICA

Depicts the culture of the Chad in French Equatorial Africa, including arts, handicrafts and ceremonies never before screened. Music rarely recorded for the screen is another outstanding feature.

i-j-h-c-a 17 minutes \$2.35

RICHESS OF GUATEMALA (IF, Color)

Includes scenes showing the cultivation of bananas, corn, pepper, chinchona for quinine, and plants for rotenone.

i-j 15 minutes \$7.50

RIDE 'EM CHICO (OF, Color)

The birth of a colt arouses in Chico, a Mexican boy, an impatient ambition to become a "charo," an expert horseman who rides in ceremonial regalia and

performs wonderful and skillful feats of horsemanship. To give Chico an idea of what it takes to be a "charo" his father tells him his own story and the story of Pavo, the horse of ex-President Camacho.

i-j-h-c-a 9 minutes \$3.85

ROUGH TURNING BETWEEN CENTERS (UW)

Emphasizes and presents in considerable detail the care and operation of the machine, the identification of the parts and controls used in rough turning, the safety precautions necessary for both operator and machine, and the necessity for following a blueprint in performing any job.

h-a 15 minutes \$2.65

RUSSIAN BALLET FOLK DANCE (BRF)

Ukrainian folk dances and ballet excerpts with Ulanova and Lepeshinskaya.

j-h-c-a 10 minutes \$3.00

SANITATION IN THE RURAL HOME (NMP)

Deals with the problems of sanitation in rural and suburban areas. Covers such topics as proper water supply, adequate disposal of human waste, rodent control, and cleanliness in the dairy.

j-h-c-a 12 minutes \$1.85

SEA URCHIN (UW)

Shows the life cycle of the sea urchin, the near relative to the starfish. Indicates the structure of both male and female and the process of reproduction. Segmentation, metamorphosis, and differentiation into layers with the formation of body cavity are all clearly shown.

h-c-a 10 minutes \$2.00

SECRET SERVICE STUDY (AE)

Portrays the role of Secret Service Agents throughout the country in safeguarding the President, combating counterfeiters, and tracking down forged checks.

j-h-c-a 17 minutes \$3.00

SELF-PRESERVATION IN ATOMIC BOMB ATTACK (UW)

Three servicemen demonstrate what civilians should do in event of atomic attack. The relative effects of heat, blast and atomic radiation are shown.

j-h-c-a 10 minutes \$1.85

SHADOW ON THE PRAIRIE (NFBC)

A ballet presented by the Royal Winnipeg Ballet Company, having as its theme the settlement of the Canadian West and concerning the fate of a young wife who comes to the prairies with her pioneer husband to begin a new life.

h-c-a 15 minutes \$3.50

SKY DANCES OF PAPANTLA (UW, Color)

The annual dance of the valdorecs in the Mexican village of Papantla. Five men dance atop a forty foot pole, then spin dangerously through the air on the end of ropes which unwind thirteen times to complete the descent.

h-c-a 11 minutes \$4.00

SNOW HARVEST (UW, Color)

Shows the important and hazardous activity of making snow surveys in the West, the techniques of measuring snow to forecast irrigation and other water supplies. The film contains beautiful winter scenery.

i-j-h-c-a 33 minutes \$4.25

SNOW WHITE AND THE SEVEN DWARFS (SF)

The Grimm fairy tale enacted by the Salzburg Marionettes.

p-i 15 minutes \$3.00

SOLAR PROMINENCES (UM)

Shows many types of eruptive phenomena which take place on the surface of the sun. The film is technical and meant for adult audiences.

c-a 11 minutes \$1.85

SONG OF THE PRAIRIE (OF)

A horse opera to end all horse operas. A satire on the singing cowboy with Metropolitan Opera voices. It has everything, the hero with the wonder voice and the wonder horse, the beautiful and brave heroine, the snarling villain, the bad, bad bandits and guitars in the night. Even the stage-coach drivers—all woven into one hilariously funny all-singing, all-shooting, all-woolly Western.

p-i-j-h-c-a 19 minutes \$1.85

SOUTH AFRICA, LAND OF CONTRASTS (FON)

Presents an over-all view of the history, development and contrasts of South Africa.

h-c-a 20 minutes \$2.35

SOUTH GROWS GREEN (UW, Color)

As the South grows green, crop diversification is replacing the older, inefficient one-crop system. The result is increased production of a variety of crops and products.

h-c-a 43 minutes \$10.00

SPANISH GYPSIES (AFF)

The setting is a grotto in Granada where a Spanish festival is being held by Spanish Gypsies. Juan Salido and a group of artists perform a group of Flamenco dances and songs.

c-a 10 minutes \$1.85

SPONGE DIVERS (RPC)

A first-hand, vivid account of the dangers and adventures of sponge fishing. The camera takes you into

the mysterious and shark-infested waters, with seasoned sponge divers—through the interesting processing to the market for sponges—one of America's little known industries.

j-h-c-a 10 minutes \$2.00

SQUARE DANCE REUNION (HAL, Color)

An old adobe hacienda on the outskirts of Hollywood, California, is the setting of this group known as the go-getters, a group of Hollywood "Westerners."

The first dance is the "Quadrille," to the tune of "Texas Star." Between dances there are rope tricks and other side entertainment. The second dance honors a couple in the group who are celebrating their 40th wedding anniversary.

j-h-c-a 10 minutes \$3.00

STORY OF PALOMAR (CIT)

A film record of the building and operation of the 200-inch Hale telescope at the Palomar observatory, including astronomical photographs and diagrams.

h-c-a 40 minutes \$20.00

STORY OF WHOLE GRAIN BREADS (GKP)

Photographed at the Los Angeles plant of the sponsor, the Orowheat Baking Company. Shows the processes in baking whole grain bread.

i-j-h-c-a 20 minutes \$3.00

STUDY OF A WORLD PORT: SINGAPORE (UW)

The factors which make Singapore the seventh largest world port are shown. The raw materials of the East meet the manufactured goods of the West in Singapore. Natural physical conditions, natural resources and life in the British colony are indicated.

j-h-c-a 12 minutes \$3.00

Silent

STUDY OF TWINS (PSC)

The study is filmed in four parts. The first part deals with the growth and development of twin boys. Shows their responses to normal situations of everyday life. Stresses motor control in infancy.

The second part demonstrates the activities of twins aged 14, 18 and 22 weeks in terms of rate of development of various parts of the body.

The third part deals with twins aged 24, 28 and 32 months and shows amicable but independent play, and rapidity of development of motor muscles and skills.

The last section deals with twins aged 12, 15, 18 and 21 months in the stages of getting up, walking and standing.

c-a Each part 17 minutes \$7.50 (both parts)

SUCCESSFUL SCHOLARSHIP (McGH)

Using as an example a girl who wishes to become a professional nurse, develops three cardinal principles of successful scholarship. The points are good planning, convenient comfortable place, and proper method.

h-c-a 11 minutes \$3.00

SURFACE CHEMISTRY (BRF)

Dr. Irving Langmuir describes some of the experiments in surface chemistry which shed light on the characteristics and properties of the molecule. Dr. Catharine Blodgett demonstrates the method for making non-reflecting glass. Dr. Langmuir explains the properties which cause oil to spread on surfaces. Ways of accurately measuring the size and shape of molecules are presented.

h-c-a 30 minutes \$6.00

TALES FROM THE VIENNA WOODS (SF)

The familiar Strauss Waltz is conducted by Josef Krips and played by the Vienna Philharmonic Orchestra.

j-h-c-a 10 minutes \$1.85

TENNIS TECHNIQUES (ROG, Color)

Illustrates forehand and backhand techniques, service and volley. Explains and demonstrates the techniques of group teaching. Includes sequences of Pauline Betz in action.

j-h-c-a 9 minutes \$3.00

THAT BOY JOE (WCTU)

The story of juvenile delinquency, its causes and preventive means, analyzed from a long-range viewpoint rather than confined to wartime conditions. It recognizes that juvenile delinquency is a large and continuing problem not confined to today alone.

i-j-h-c-a 20 minutes \$3.00

TIENTSIN: GATEWAY TO NORTH CHINA (ATH, Color)

Shows the efforts of China's second largest seaport city to maintain harbor facilities and maintain trade, improve slums and expand educational institutions.

"Gives insight into China's aspiration toward modern industrialization and her problem in educating the masses."

j-h-a 10 minutes \$2.70

TIPS ON TYPING (UND)

Demonstrations of typing techniques by George L. Hossfield, professional typewriting champion.

h-a 21 minutes \$2.00

TOWARD EMOTIONAL MATURITY

Explores the causes of unreasoning emotion and examines ways in which the adolescent can be prepared to understand and control his emotions. In the

film an average 18-year-old student is faced with a decision that deeply involves her feelings for both her parents and a boy whom she likes very much. Shows how strong emotions can rob a person of sensible values and leave him incapable of handling a situation.

h-c-a 11 minutes \$3.00

TOYS FROM ODDS AND ENDS (BRF)

A brief display of toys made from odds and ends of cloth, wool, yarn and rubber. A detailed demonstration of a small woolly dog is illustrated.

i-j-h-a 10 minutes \$2.00

TRADITIONAL ENGLAND (FON, Color)

Places famous in history, literature and legend, the Shakespeare and Lorna Doone Countries, Tintagel, Glastenbury, York, with memories of King Arthur, Westminster Abbey, the Tower of London and many other fascinating locales.

i-j-h-c-a 13 minutes \$6.00

TREES ARE A CROP (NFBC, Color)

A demonstration of efficient wood-lot management showing how a farmer can get the maximum out of his tree production and enhance his yearly income. The danger of short-sighted policy is clearly illustrated through the story of Joe Kelly who learns what not to do in tree conservation practices.

h-c-a 23 minutes \$6.00

TWO MILLION ROOMS (McGH)

Shows the hotel business as it stands today in America. How the hotels are set to cater to the whim and fancy of the public, and shows how this five-billion-dollar industry functions from within.

h-c-a 20 minutes \$3.00

UNDERSTANDING CHILDREN'S DRAWINGS (AFF)

Pictures children of ages three to seven at work in art classes of the Manhattan Jewish Center in New York City. Based on the teachings of Victor Lowenfeld, the film follows the child's progress from primitive scribbles through recognition of form and design to the final emergence of a story-telling picture.

a 10 minutes \$2.00

U.N. IN KOREA (UN)

Traces the events leading up to the United Nations' intervention in Korea. Pictures important events of the war and the steps leading to the truce.

h-c-a 30 minutes \$3.00

UNIT OF PERSONALITY (PSC)

Consistency of expressive movements are shown for each of five individuals with different personalities. The film is in part without the knowledge of the

participants and the action is spontaneous and characteristic. Includes almost all common gestures and movements.

c-a 18 minutes \$3.00

VENEZUELA MOVES AHEAD (UW, Color)

An analysis of Venezuela from an economic, historic and geographical point of view. Excellent use is made of maps and special attention is given to Venezuela's most important industry — oil. The unusual development of Caracas is illustrated.

i-j-h-c-a 36 minutes \$10.00

WORLD IS RICH (BRF)

Deals with the world food situation today. The shortage of food throughout the world is still acute; the war was only a partial cause. The film emphasizes that backwardness in many countries coupled with floods and droughts never allow enough food to feed all the people properly. The plan drawn up by the United Nation's Food and Agriculture Organization for permanent improvement of farming throughout the world is described.
